### ONCOLOGY SERVICES

### CARDIOLOGY SERVICES

### VAD PROGRAM

### MECHANICAL ASSIST DEVICE IMPLANTATION

### MISCELLANEOUS EQUIPMENT & SUPPLIES (WOUND CARE, OSTOMY, UROLOGICAL, DME, RESPIRATORY)

### NEGOTIATION SERVICES

*The nature of hemophilia, von Willebrand disease and other bleeding disorders requires a high-touch model of care and specialized clinical expertise. High touch doesn't have to mean high cost. The LifeTrac® Continuum Hemophilia Program powered by BiologicTx, a member of the BioMatrix family of companies, is national in reach, yet local in scope.*

## Patient Support and Education Included with Every Dose

Receive not only **deep discounts** off of the average wholesale drug price, but included in the cost are extensive complimentary patient support and education which benefit the patient and payer.

Our high-touch model of care can result in:

- **Increased compliance and quality of life**—a coordinated team of specialized regional care coordinators and registered pharmacists provide patients and their families with support and education to customize care through close monitoring and care plan adherence.
- **Less waste**—Excess medication can expire and become an unnecessary expense for patient and payer alike. We provide real-time management and maintenance of the patient's product and ancillary supplies.
- **Optimized medication regimen**—Clinical experts identify the most cost-effective solutions for improved quality of life (i.e. a more aggressive prophylactic treatment rather than on-demand treatment may be appropriate for an individual).
- **Additional potential cost savings due to:**
  - Less frequent bleeding episodes
  - Reduced number of needed infusions
  - Fewer emergency room visits and hospitalizations

Why pay just for hemophilia medications when you can get those same drugs AND, *at no additional cost*, specialized care support services?

## All-inclusive cost for drugs, supplies AND extensive support services

### Clinical and Pharmacy Services

- Deep discounts based off of AWP
- Clinicians with extensive bleeding disorder knowledge and experience
- On-call pharmacists available 24/7
- Comprehensive line of factor products
